JOB TITLE

Experienced in Ruby on Rails and JavaScript-based programming and a background in multi-drop delivery services, on-site surveying, and restaurant management. Possess strong communication, decision-making, and problem-solving skills to deliver great customer service, as well as excellent organizing and planning skills that enable adaptability and help to provide the first-class service and meet deadlines.

TECHNICAL SKILLS

Ruby, Rails, SQL, Javascript, React, Redux, Sinatra, Bootstrap, Cascading Style Sheets (CSS), HTML

TECHNICAL PROJECTS

Raffle - Github | Demo
Raffle is a web app that provides several contests where any user can buy tickets and participate.
- Utilized the built-in React toolkit to build user-facing features.
- Building React components to boost productivity and to facilitate further maintenance.
- Utilized Redux data-flow architecture to organize the app state.
- Implemented Thunk Middleware to ensure an asynchronous movement of the app.

Topz - SPA - Github | Demo
Topz is a one-page app that shows a list of user-created tops, about any topic. Any user can create, add a new option, and vote for any top.
- Developed a Rails API backend with endpoints for tops, options, and votes.
- Handling user events and changing DOM elements to deliver an interactive user interface.
- Used asynchronous techniques to ensure a continuously working app for the user.

RGadgets - Github | Demo
RGadgets it's a web app created in Ruby on Rails that simulates a website for an online store.
- Utilized B-Crypt Gem to ensure a safe storing of users passwords.
- Designed the app using the MVC pattern to implement the separation of concepts.
- Made use of OAuth Gem to implement a safe and fast login/signup for the user.
- Used the Bootstrap framework to create a modern website front-end.
